

Epson ColorWorks Low Migration inks

Epson DURABrite Ultra and UltraChrome DL Inks are low migration inks

Testing by Eurofins Food & Product Testing Japan K.K. between February 2 and May 16, 2017 under the standardized testing conditions set out in Annex V of the EU Plastics Implementing Regulation (EU) 10/2011 confirmed that DURABrite Ultra and UltraChrome DL with JetGloss RPA4 KS70 on PET and PP are within the Overall Migration Limit set by that Regulation.

This test result does not relieve the manufacturer of the finished article and the filler from their responsibilities to ensure the whole packaging complies to EU Regulation (EU) 1935/2004 on materials and articles intended to come into contact with food. Owing to the fact that a combination of inks, coatings and substrate used together create a package, further packaging testing by manufacturers and fillers is anticipated by Epson.
